

The Difference is Clear...

Le Bozec Rain Repellent™ Fluid and Supply System Improves Windshield Visibility

Technology Advancement
in Aircraft Applications

Windshield visibility is a serious issue for pilots. Wipers may not be effective in moderate to severe rain. In addition, the field life of windshield coatings is limited, ranging from one week to one year, depending on flight conditions. Donaldson Le Bozec has developed its Rain Repellent™ Fluid and Supply System to improve windshield visibility in even the most adverse weather and flight conditions.

Donaldson®

Donaldson®

Simple to Use

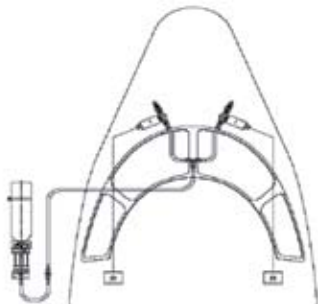

When rainy conditions degrade windshield visibility, the pilot simply flips the Rain Repellent™ switch and the system delivers a calibrated quantity of fluid. In a matter of seconds, visibility is nearly perfect.

The Difference is Clear – the windshield on the right has been treated with Rain Repellent™ fluid and has near-perfect visibility.

Rain Repellent Characteristics:

- CFC-free
- Highly efficient – fast acting, long-lasting
- No buildup or distortion – can be used as needed
- Non-toxic, non-corrosive and non-flammable
- Can be used in conjunction with wipers

Rain Repellent Supply System

Donaldson Le Bozec has also developed a supply system for the Rain Repellent fluid. This system features two solenoid valves independently activated, two nozzles (customized for each application), a visual reservoir equipped with a pressure gauge, a purge and an optional electrical float.

Rain Repellent System Aircraft Approvals

AIRBUS A300/A310	Type Certificate
AIRBUS A318/A319/A320/A321	Type Certificate
AIRBUS A330/A340	Type Certificate
AIRBUS 380	Type Certificate–Open
BOEING B737 Classic	Le Bozec–Owned Supplemental Type Certificate
FALCON 7X	Type Certificate
TOPOLEV Tu 334	Pending
SUKHOI RRJ	Pending
