

Extend Your Service Intervals with Donaldson Endurance™ Liquid Filters

Donaldson Endurance™ lube filters are designed for extended filter maintenance programs for heavy-duty engines.

All Donaldson Endurance lube products offer the best engine protection available.

Features:

- Exceeds OEM filtration specs
- Synteq™ lube media
- Improved, high-grade gasket and grommet material stays flexible after extended exposure to hot oils with advanced additive packages
- Donaldson Endurance lube filters have significantly lower restriction than conventional cellulose media filters

Benefits:

- Greater contaminant holding capacity than conventional cellulose filters
- Higher efficiency
- Better engine protection during cold starts

TRUCKING

Competitive Data

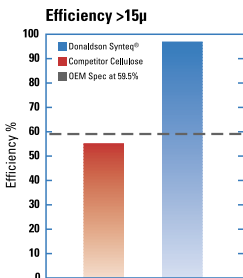

Donaldson ELF7300 Exceeds OEM Filtration Specifications

Tested per ISO 4548-12

Higher Capacity

Donaldson Endurance lube filters have greater holding capacity than the competitors conventional cellulose filters.

Tested per ISO 4548-12

Higher Efficiency

Dirt and other small contaminants cause wear that reduces engine life. Our extended service lube filters are more effective than cellulose media in removing these small contaminants.

More information on lube filters is available online at www.donaldson.com/en/engine/support/datalibrary
