

Now Available: PSD Family of Air Cleaners with PowerCore™

Our smaller, more efficient PowerCore™ air cleaners can be adapted for use in a wide range of vehicles and engine sizes.

Features and Benefits

- PowerCore air cleaners are more compact at a given performance level than standard pleated filters
- Improved engine protection: no media movement, expansion, contraction or bunching
- Improved contaminant encapsulation: dust and dirt stay contained in filter during service
- Improved filtration efficiency:
 - More efficient than the average conventional pleated filter
 - PowerCore™ Filtration Technology with high efficiency pre-cleaner tubes improve engine protection

TRUCKING**MINING****CONSTRUCTION****INNOVATION**

Maintenance is simple with lighter, smaller and metal-free air filters. A built-in service handle attached directly to the filter makes changing filters a snap.

Applications

- Off-road equipment operating in medium-dust conditions with engine airflow ranges up to 1060 cfm / 30 m³/min
- Obround housing shape allows for a narrow or wide mounting orientation
- Models include end filter service access and side filter service access
- Sustained temperature tolerance: -40° to 180°F / -40° to 82°C

More information on the PSD family of air cleaners can be found at www.donaldson.com/en/engine/support/datalibrary/034267.pdf
