

Do Emissions Requirements Get You Dazed and Confused?

If so, you should check out our online resource center for diesel engine emissions technology!

www.donaldson.com/en/erc

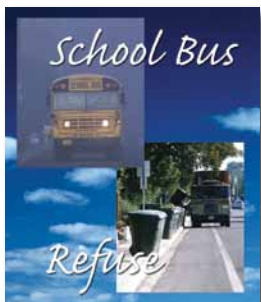

Donaldson's online Emissions Resource Center is easy to use and provides key tools and information for diesel engine truck owners, operators and maintenance personnel needing to conform with pending nationwide emissions standards.

This web site provides free access to key emissions control information, including descriptions of leading technologies used to reduce engine emissions, the benefits of retrofitting a diesel engine exhaust system, and the potential health impacts of diesel engine emissions.

Shoptalk

The Emissions Resource Center web site features a range of emissions control technology resources and updates on the stringent regulations. These regulations are imposed by Clean Air legislation from respected industry organizations such as the American Lung Association, United States Environmental Protection Agency, Clean Air Task Force, Diesel Technology Forum and more.

Learn more about the issues and technologies available to help dramatically cut emissions, improve air quality and conform with current and pending nationwide emissions standards.
