

Take a Look at Air Filtration Efficiency and Dust Holding Capacity

Donaldson Air Filters
Ultra-Web® Filter Media

Donaldson Air Filters
Standard Filter Media

Will-fit Air Filters
Standard Filter Media

Compare for yourself – see how much dust can pass through your air filter during 500 hours of operation.

You Can See the Difference!

These dust vials show the actual amount of Arizona fine test dust that passes through the air filter media for every 1 kilogram of dust fed to the air filter, which is equivalent to 500 hours* of equipment operation. Will-fit filters can allow up to 100 times more dirt to pass through the filter into the engine than Donaldson Endurance™ air filters with Ultra-Web® filter media.

* Estimate based upon typical medium dust operating conditions with 92% pre-cleaner efficiency. Actual results may vary.

Ultra-Web[®]

Nanofiber Filtration by Donaldson

Genuine Air Filters
With Ultra-Web[®]
Filter Media

Don't leave engine protection to chance!

Use Donaldson Endurance[™] air filters with the blue Ultra-Web[®] nanofiber media for maximum filtration efficiency and superior dust holding capacity.

Donaldson Ultra-Web[®] nanofiber filtration technology delivers cost saving benefits:

- Superior filtration
- Long filter life with submicron contaminant
- Highest efficiency
- Ideal for extended maintenance intervals
- Longer engine life

More information on Donaldson air filters with Ultra-Web filter media can be found at:
