

### Clean Buses for Kids

The Clean Buses for Kids Program included \$20 Million in funds offered up to school districts and other eligible public entities to purchase and install emission control equipment on diesel-powered school buses. [www.cleanbusesforkids.com](http://www.cleanbusesforkids.com)

### Out of 56 Participants 28 Selected Donaldson

Fifty-six school districts around the U.S. were chosen for the funds. Donaldson was one of seven suppliers to the schools, half of the participants selected Donaldson.

### 1233 Buses with Donaldson Retrofits

Buses included 1994-2004 model years and a variety of bus makes and models. Total number of buses participating 2166.

### Installations performed by 17 dealers in 13 states

### Customized Support

**Dedicated Program Manager**

**Fleet Assessment**

**Application Support**

Donaldson assigned a program manager to this project who served as the main coordinated point for sales, engineering, dealers, school maintenance personnel and the Clean Buses for Kids program manager.

The program participants were all provided communications throughout the entire process – from fleet assessment through final the installation.

### Retrofit Solution

**DPF Muffler Kit, Hardware**

The filter in the DPF Mufflers require routine maintenance so Donaldson included the DPF cleaning system in the overall package.

### DPF Cleaning System

Pulse Cleaner (left) and Thermal Regenerator (right)

**Overall Emissions Reduction - 90%**
