

High quality thermal jackets designed specifically for Donaldson steam housings.

Donaldson steam housing jackets are specially crafted for Donaldson P-EG and PG-EG housings to protect from high temperatures generated by steam. The jackets are CAD and CNC produced for exact fit and finish to maximize thermal protection and minimize potential heat loss. All jackets are tagged for identification and include an integral fastener for easy on and off service and inspection.

Our jackets are guaranteed to fit our P-EG housings. The fiberglass mat insulation provides protection against heated housing surfaces while preventing excess thermal energy loss. Donaldson steam housing jackets provide the protection you need to improve the work environment and save energy in high temperature steam applications. Steam jackets for PG-EG and other P-EG sizes are available on request.

P-EG Steam Housing Jacket

FEATURES	BENEFITS
CAD and CNC produced	Exact fit and finish maximizes thermal protection and minimizes heat loss
Integral fastener	Easy on and off for service and inspection
Tri-fold silicone cloth binding	Superior build quality to ensure ruggedness in harsh environments

SPECIFICATIONS

MATERIALS	
Insulation Thickness	1" Nominal
Insulation Media	Needled fiberglass mat filler
Outer Cover	Grey silicone impregnated/coated fiberglass
Fastener	Velcro flaps/wire twists
Stitching	Double sewn lock stitch

SPECIFICATIONS
