

Donaldson Delivers
ADDED PROTECTION

11µm Diesel Fuel Filter Kit
for Flow Rates up to 114 LPH

CLEANLINESS IS CRITICAL

A small amount of contamination can severely damage your engine.

Contaminated fuel can lead to vehicle downtime and costly repairs, especially to expensive common rail systems and components. Modern engines are increasingly requiring better fuel filtration technology to ensure delivery of the cleanest fuel to your vehicle's fuel system.

Donaldson's diesel fuel filtration kit provide additional protection for your vehicle, providing cleaner fuel; keeping you up and running and out of the workshop.

- Ideal for many 4WD applications
- Includes bonus filter element - keep one spare in the vehicle

SPECIFICATIONS

Donaldson Part No: **P902976**

Diesel Fuel Filter Kit

Part Number	Qty	Description	Specifications
P560382	1	Head Assembly	2x 1/4"-18 NPT Ports Working Pressure 100psi (6.8bar)
P550588	2	Spin-on Filter	Length: 141mm O.D.: 80mm Efficiency: $\beta_{11} = 100$ (99% @ 11 micron) Water Separation Properties
P569758	1	Drain Bowl	Length: 55mm O.D.: 80mm,
P5606053	2	Straight Fitting	3/8" / 10mm Tail x 1/4" NPT Thread, Straight
P5606054	1	Right-Angle Fitting	3/8" / 10mm Tail x 1/4" NPT Thread

NOTE: These items are also available to purchase separately. Fuel hose, clamps and connectors are not included. All kits manufactured from mid October 2013 include the 3/8" fittings as shown above. 5/16" / 8mm fittings are still available to purchase separately, Straight Part # PFENP30504, Right-Angle Part # PFEP60504

Uncertain of how often you should drain the water from your fuel filter?

Installing Donaldson's Water in Fuel Sensor & Dash Mount Display Kit will take out the guess work by providing a visual warning for when separated water is present in the filter and needs to be drained.

WATER IN FUEL SENSOR LED DISPLAY KIT

Part No.	Power Supply	Dashmount Display Size
X220112	6V 30V DC	66.3mm (w) x 50mm (h) x 15.4mm (d)
