## Engine Air Replacement Filters for Mann+Hummel® Entaron Air Cleaners

## Proven protection for heavy-duty diesel engines

Donaldson's new high-efficiency air filter may look a little different out of the box, but it's specifically designed to fit Mann+Hummel® Entaron air cleaner housings used in heavy-duty backhoe applications.

This filter's unique sealing system incorporates specially designed teeth that compress to cushion and hold the filter in the ideal position, providing a secure seal – even in the most severe environments.

### Packed with proven technology

This new air intake filter is built to perform and provide effective engine protection, in a wide-range of challenging conditions. It's equipped with Donaldson's industry-shaping RadialSeal™ design, high-efficiency media, and an inner and outer liner that provide dependable structural support.

## Durable construction delivers reliable protection

### Vibration Resistant

Innovative Dual Compression saw-tooth design incorporates an inventive combination of soft and hard urethane that generates high levels of compression – maintaining secure RadialSeal integrity. Filter resists movement (even under heavy vibration) and delivers sure sealing under the most severe-duty conditions.

### RadialSeal™ design

Proven sure-fit Donaldson sealing system creates a reliable interface between the air cleaner and the filter. Slides easily on and off the outlet tube during servicing, making removal and replacement fast and simple.

### High-efficiency cellulose media

Media is designed to perform across a wide range of heavy-duty diesel engine applications.

### Rigid structural support

Outer and inner liners (inner liner not shown) protect filters from damage or collapse in humid conditions or heavy vibration applications. Structure also protects the media from damage during servicing.
