

Exhaust and Emissions

Diesel Particulate Filter (DPF) V-Band Clamp

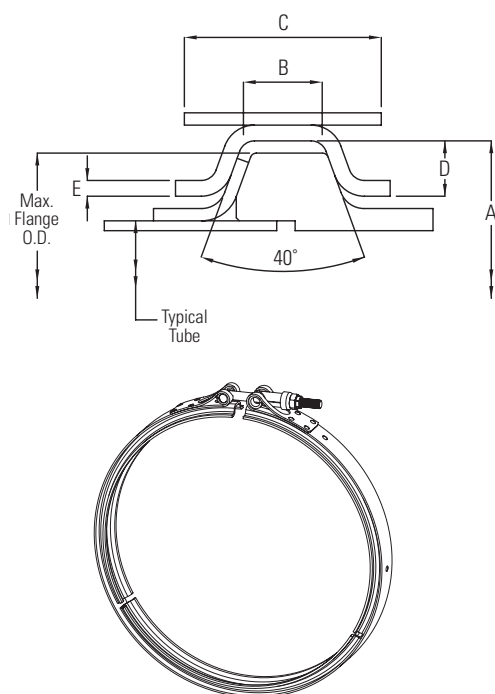

Donaldson V-Band Clamps are designed for popular heavy duty truck DPF systems. The clamp band's v-retainers and all metal lock nut are constructed of 300 series stainless steel and come with a T-bolt latch constructed of 420 stainless steel for added durability.

The V-band couplings are easily assembled and disassembled for ease of use during service and maintenance. The T-bolt latch provides high tensile strength, durability and corrosion resistance, making them perfect for heavy-duty applications.

Choose from a variety of sizes to fit your application.
