Donaldson Blue™

Hydraulic Filters for Schroeder® KZ5 & KZ10 Series

Blue is better.

Schroeder® is a registered trademark of Schroeder Industries, LLC.

Donaldson Blue™ Hydraulic Cartridges

We're expanding our **Donaldson Blue** product line with a first ever **Donaldson Blue Hydraulic Filters**.

Like the rest of the **Donaldson Blue** line of air, lube, fuel and bulk tank filters, these new hydraulic filters offer best-in-class performance. **Donaldson Blue Hydraulic Filters** deliver significant advantages over competitive filters.

- **Superior efficiency** – for *cleaner fluid and less damaging contaminant* in your hydraulic systems
- **Longer filter life** – for *extended filter change intervals*, reducing time and expense for servicing equipment
- **Reduced flow restriction** – to *minimize energy loss and time in filter bypass*, even during cold starts

Long story short – **Donaldson Blue Hydraulic Filters** deliver better system protection and performance when compared with Schroeder KZ5 and KZ10 filters.

By the Numbers

How do Donaldson Blue Hydraulic Filters deliver increased system protection and reduced operating costs? They deliver the optimal balance of efficiency, capacity and flow restriction. Proof is in the performance.

Efficiency

- DBH6018 – 5 micron filters remove 1.5 times more contaminant than Schroeder KZ5
- DBH6019 – 10 micron filters remove 14 times more contaminant than Schroeder KZ10

Capacity

- DBH6018 delivers 18% greater contaminant holding capacity (longer filter life) than Schroeder KZ5
- DBH6019 delivers 34% greater contaminant holding capacity than Schroeder KZ10

Flow Restriction

- Donaldson Blue Hydraulic filters deliver up to 37% lower restriction than Schroeder KZ filters

Donaldson Blue Hydraulic Filters help protect equipment, reduce maintenance cost and increase equipment uptime – which has a direct impact on your bottom line.

Superior Efficiency, Better Protection

Donaldson Blue™ filters **outperform**

Schroeder KZ5 and KZ10 filters at both the 5 micron and 10 micron levels.

Donaldson Blue filters achieve efficiencies reaching up to 14x higher than Schroeder, delivering cleaner fluid, better performance and better protection throughout the lifetime of your equipment.

Efficiencies are compared by forming beta ratios, which are represented by *contaminant-in* divided by *contaminant-out*.

START TO FINISH

1.5-14x

more efficient

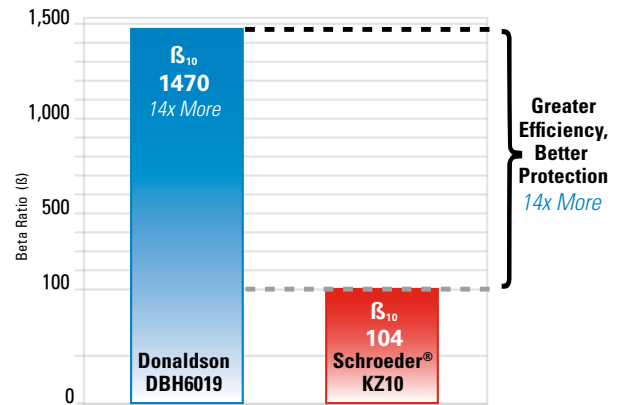

than Schroeder KZ5 & KZ10 Aftermarket Filters

Beta Ratio (β) @ 5μm particle size¹

¹Tested per ISO 16889 at 53 GPM / 200 LPM. Termination at 50 PSI / 345 kPa.

Beta Ratio (β) @ 10μm particle size²

²Tested per ISO 16889 at 53 GPM / 200 LPM. Termination at 50 PSI / 345 kPa.

Longer Filter Life

Greater contaminant holding capacity means longer filter life, so you maximize your uptime and spend less time and money servicing equipment.

Contaminant Holding Capacity³ 5μm

³Tested per ISO 16889 at 53 GPM / 200 LPM. Termination at 50 PSI / 345 kPa.

Contaminant Holding Capacity⁴ 10μm

⁴Tested per ISO 16889 at 53 GPM / 200 LPM. Termination at 50 PSI / 345 kPa.

Reduced Flow Restriction

Lower Pressure Drop – Better Filtration Performance

Lower pressure drop (lower flow resistance) means your system is less likely to operate in bypass mode, which can result in contamination bypassing the filter and damaging critical components in your system. Lower pressure drop also results in reduced system energy loss.

As the graphs show, **Donaldson Blue™ Hydraulic** filters have equal-to or lower pressure drop than Schroeder KZ series cartridges (**up to 37% lower** for the KZ10).

Donaldson Blue Hydraulic filters deliver. **Blue is better.**

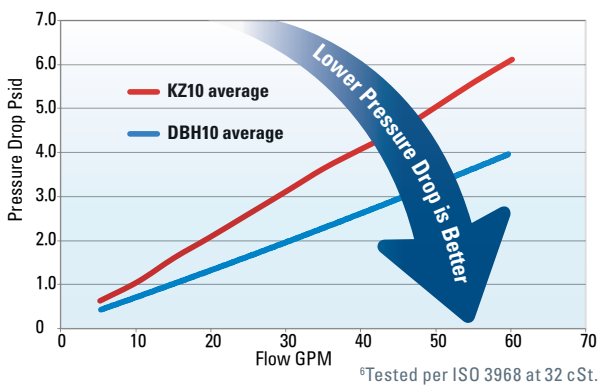

Cross Reference

Donaldson Blue Hydraulic filters cross reference to a variety of popular filter brands listed below.
